WORK EXPERIENCE

AI & Robotics Ventures

Aug 2022 – Present

Senior Fullstack Developer

Own and drive products end to end across the company

- Applied modern AI engineering workflows (Superpowers, Pi Harness, Hermes remote workflow) to accelerate day-to-day delivery
- Researched context and token optimization techniques for agent harnesses (RTK, context-mode, Ponytail, etc.)
- Acted as domain champion for the authorization service and implemented Casbin for domain-scoped RBAC
- Migrated the security scanning pipeline to Trivy, reducing tooling cost previously spent on Snyk
- Optimized the PDF generation service to render 1,000+ page documents in significantly less time
- Performed full-loop root cause analysis across microservices and delivered corrective solutions
- Built an inspection platform on Rust microservices
- Implemented and maintained a shared UI library across multiple repositories
- Developed a micro-frontend for the data storage product
- Defined the structure and architecture of frontend projects
